JOB DESCRIPTION – Junior Surveyor

Job Role: Junior Surveyor

Location: Bangalore, Karnataka

Introduction

We are looking for a detail-oriented surveyor to join our team at Guideline Surveying Consultants.

As a surveyor, you will be vital in collecting and analyzing data to support our clients' engineering and construction projects. You will conduct surveys and provide crucial insights to our CAD teams. You will also have access to state-of-the-art surveying equipment and technology, enabling you to deliver high-quality results.

The ideal candidate must have a strong understanding of surveying techniques, topographic surveys and site analysis. If you are passionate about the field of infrastructure and have a keen eye for detail and precision, we invite you to apply. We offer competitive compensation, benefits packages and a supportive work environment with professional growth opportunities.

Objectives of this role

- Conduct surveys using advanced equipment and techniques to gather accurate measurements and data, including topography, boundaries and existing structures.
- Identifying land boundaries, markers and existing infrastructure to ensure compliance with legal and regulatory requirements.
- Assessing site suitability, analyzing topography and evaluating potential risks to support project feasibility studies.

Your tasks

- Carry out field surveys to measure and map land, using various surveying instruments to establish precise control points and reference systems.
- Collect precise measurements, coordinates and other relevant data, like elevation, distance and angles, to establish boundaries and features of the land.
- Perform topographic surveys to map natural and man-made features of the land, including contours, vegetation, utilities and structures.
- Ensure compliance with surveying standards, regulations and safety protocols in India.
- Communicate with project stakeholders, including clients, engineers and contractors, to clarify requirements and address survey-related concerns.
- Maintain and calibrate survey equipment to ensure accuracy and functionality.
- Follow safety protocols and procedures during fieldwork and adhere to ethical standards in surveying practices.
- Stay updated on the latest trends and technologies in the surveying field.

Required skills and qualifications

- ITI/ Diploma/ Bachelor's degree in surveying, geomatics, civil engineering or a related field.
- 0-2 years of experience in surveying or a similar role.
- Strong knowledge of surveying techniques preferably in the Indian context.
- Experience in land survey laws, regulations and practices in India.
- Proficiency in using surveying instruments, such as total stations, GPS receivers, laser scanners and CAD software for surveying and land mapping.
- Solid understanding of survey calculations, geodesy and coordinate systems.
- Ability to work both independently and collaboratively with effective communication and collaboration skills to work with multidisciplinary teams.
- Physical stamina and ability to work outdoors in various weather conditions.
- Valid Driver's License.

Preferred skills and qualifications

- Professional certification, such as a Licensed Professional Surveyor (LPS) or Certified Survey Technician (CST).

Why Join Us?

At **GUIDELINE SURVEYING CONSULTANTS**, we value talent and provide opportunities for professional growth.
